

ASSIGNMENT – 4

Assignment Date	20 October 2022
Student Name	SHAM KUMAR J
Student Roll Number	311019104080
Maximum Marks	2 Marks

1. Pull an Image from docker hub and run it in docker playground.

2.Create a docker file for the jobportal application and deploy it in Docker desktop application.

Dockerfile:

FROM python:3.6

WORKDIR /app

ADD . /app

COPY requirements.txt /app

RUN python3 -m pip install -r requirements.txt

RUN python3 -m pip install ibm_db

EXPOSE 5000

CMD ["python", "app.py"]

Docker Desktop

Update to latest

4. Create a Kubernetes cluster in IBM cloud and deploy helloworld image or jobportal image and also expose the same app to run in nodeport.

The screenshot shows the IBM Cloud console interface for a Kubernetes cluster named 'mycluster-free'. The top navigation bar includes the IBM Cloud logo, a search bar, and user account information. The left sidebar lists navigation options: Overview (selected), Worker nodes, Worker pools, and DevOps (marked as 'New').

The main content area displays the cluster status and details. At the top, a warning banner states: 'Expires in 29 days: Be sure to back up your data, your cluster will be deleted in 29 days. To access the full capabilities of the service, try out a standard cluster.' Below this, four status cards are shown:

- Node status:** 1 of 1, Normal (with a 'Details' link).
- Add-on status:** 0 of 0, Normal (with a 'Details' link).
- Master status:** Normal (with a 'Docs' link).
- Ingress status:** Healthy (with a 'Docs' link).

The 'Details' section provides the following information:

Cluster ID	Version	Infrastructure	Zones
cdp1ec1f9nak0icjqa3g	1.24.7_1542	Classic	Milan 01

Created	Resource group	Image security enforcement
11/15/2022, 2:09 PM	Default	<button>Disable</button>

At the bottom, there is a 'Node health' section with a link to 'Worker node details'.
